Enabling your 2.1i software for Virtex-E

Please follow these steps to enable Virtex-E device support for your Alliance or Foundation Series 2.1i product.

1 Get Your CD Key

In order to install Virtex-E device support, you will need to convert your current 2.1i CD-Key to one which will enable Virtex-E as an installation option.

Your current CD-Key can be found on the back of the CD case you received with your 2.1i software.

To receive a new CD-Key, fill out the form below:

Note: If you have already registered with Xilinx and would like us to fill in your personal information, just click on the Register Once button below. If you are **not** registered you can do so by filling out our Guestbook.
